Virginia State News

Delegates and alternates are being invited to approximately 150 congregations of the Virginia Conference of United Brethren Church, whose annual session will be held in Second Church, Martinsburg, W. Va., during the first week of October. Bishop G. D. Batdorf, Harrisburg, Pa., will preside. The attendance of delegates and state-aid preachers will exceed 200.

Automobile races, oratory, and field day exercises featured Virginia's celebration of Labor Day as Richmond and the State as a whole joined in observing an annual playday sponsored nearly fifty years ago by the Knights of Labor. The chief feature of the day was Mrs. Gifford Pinchot, wife of the governor of Pennsylvania, who addressed thousands of workers gathered for their annual outing at Buckroe Beach.

The following permanent officers were elected at the completion of the organization of a Chamber of Commerce for New Market, 10 miles west of Winchester. J. S. Calvert, president; Harold Essex, vice-president; Mrs. Miller, secretary, and T. R. Beahm, treasurer. Membership in the chamber was increased and are as follows: Major E. M. Brown, H. B. Chapman, W. P. Harrell, W. C. Holsom, and Mrs. George Parrott.

Great interest is being shown in the activities of the Woman's Club of Hopewell planned for the coming fall and winter months, which will be under the leadership of the new club president, Mrs. Frank C. Maloney. Other officers elected for the new year at the final business meeting in May were: Mrs. W. L. Broaddus, vice-president; Mrs. Frank H. VanBenschoten, recording secretary; Mrs. Harry Hartnell, corresponding secretary; Mrs. Walter K. Morrell, treasurer.

Paul Brown, 42, of Culpeper, was struck by an automobile as he was crossing the Washington Highway at a half-mile north of Fredericksburg. He was taken to Martha Washington Hospital in that city, where attendants reported he was suffering from a fractured skull, internal injuries and multiple cuts and bruises. C. H. Lyon, 27, of Tappahannock, was the driver of the machine figuring in the accident, which police reported was unavoidable. Brown is the father of ten children.

Surprised in the act of finishing a run of fifteen gallons of whiskey at an illicit still four miles south of Star Tannery, near the Shenandoah County line Saturday night, by Sheriff Mc-Kay Smith and Deputy Sheriff Frederick County, Carter Newcome, of Frederick County, Gordon Grindorf and Claude Racey and the former's 14-year-old son, Virgil, were arrested. Officers destroyed over thirty barrels of mash and confiscated a still of seventy gallons capacity, which was found in the woods near the still was stored in Winchester. The Grindorfs and Racey were held for hearings.

Work has already been started on the 1935 budget for the city but City Manager H. W. B. Hart will not be ready to report the draft to the City Council until later, during December. The appropriations will be for the fiscal year beginning January 1, and the budget faces a $200,000 cut in taxes in the realty assessment, for that seems to be about the figure to be cut from the work of the land assessors. The city manager is proposing to put on a $1 head tax on women, which will yield around $8,000 and other sources of revenue are being sought. But most of the loss will be taken care of by tax rate increase. The current tax rate is $2.10 and it is feared that it will be necessary to raise it to from $2.50 to $2.70 to meet the contingency arising from a real estate value slump.

Danville Hospital, Inc., has been purchased for $30,000 by 360 local citizens who propose to operate the institution as a community and group hospital insurance plan and through four trustees. Their investment will permit them to have thirty days' hospitalization annually at one-fourth the usual charges. It is proposed to widen the membership to 1,000, giving people from this entire section on the Virginia side of the boundary the participating membership the larger will be the public benefits. The deal will be consummated next week by the formal transfer of the property. Group hospitalization was first suggested by Dr. R. W. Barnett, city health officer, who broached the matter some months ago before the City Council, which is a community forum on public matters.

A full list of directors of the newly organized Washington-New Market branch of the Lee Highway Association was announced here by Arthur Clarendon Smith, of Washington, its president. They are as follows: J. Leo Kolb, Ralph Bowley, Harry Brough, Washington; R. A. McIntyre, B. C. Pearson, J. Green Carter, Thomas E. Grank, Warrenton; Scott Calvert, Major E. M. Brown, John C. Miller, Dr. C. E. Johnson, J. Clifford Latham, W. J. Wood, Berryville; George R. Linkervilly, Centerville; R. T. Morrison, J. W. Burgess, W. P. Hershberger, J. R. Mims, E. C. Berry, Luray. A meeting will be held at the Mimslyn September 11th for the purpose of completing unfinished business and to launch immediately into a campaign for the construction of a dual highway and parkway from Washington to New Market. A ladies' auxiliary for the purpose of promoting the landscaping of the parkway will also complete its organization at that time. Washington members are Mesdames Evans, Smith and Fred. The county members have not been selected.

News Review of Current Events the World Over

Secretary Morgenthau on Costs of New Deal—Realignment of NRA Codes—Interesting Results of Recent Primaries.

By EDWARD W. PICKARD

© by Western Newspaper Union.

SECRETARY OF THE TREASURY MORGENTHAU, in his first speech since taking office, forecast an eventual inflation of $2,500,000,000 by announcing the treasury expects sooner or later to apply its gold "profit" to a reduction of the national debt. "For the present this $2,500,000,000," he said, "we lock and key." Mr. Morgenthau said, "Most of the authority of congress, is segregated in the so-called stabilization fund, and for the present this power is going to keep it there. But I call your attention to the ultimate power we set this profit to flow back into the stream of our other revenues and thereby reduce the public debt."

The "profit" in question accrued through a bookkeeping operation when the amount of gold fixed by law as the equivalent of $1 was reduced from 25.8 grains to 15 5/21 grains. That meant that an ounce of gold was worth $20.67 one day and the next had a value of $35.

Secretary Morgenthau

Just previously the treasury had taken title to all the monetary gold in the country, paying for it at the $20.67 rate. On every ounce it made a "profit" of $14.33, the difference between the purchase figure and $35.

The secretary gave figures his estimate of the cost of the New Deal, to date, as follows:

Against an increase of $6,000,000,000 in the national debt be assessed, various assets should be deducted. He listed them as follows:

An increase of $1,000,000,000 in the treasury's cash balance since March 4, 1933.

The gold "profit," amounting to $2,500,000,000.

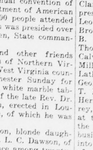
An increase in the net assets of agencies wholly owned or financed by the government, amounting to $1,000,000,000.

Morgenthau did not carry the proposition through to its natural conclusion, but the cost of the New Deal under his theory would amount to $500,000,000.

GEN. HUGH S. JOHNSON, through a spokesman, has flatly denied the story of his dispute with Donald Richberg and Secretary of Labor Perkins over control of the NRA, but well informed sources in Washington believe it is true. The President calmed this storm but put off the decision. The NRA is labor organization, supposed to serve until the next congress gives it permanent form, and for the present Johnson retains his supremacy.

To bring about greater efficiency and flexibility the codes of the NRA are being realigned. Industry is divided into 22 major groups and each of these has one or more codes. Some of the codes cover hundreds of thousands of workers gathered together in single establishments. The idea is to apply only to certain seasons and these are not as objectionable to domestic producers as they might otherwise be.

As against the concessions made to Cuba, which are regarded as so important from the standpoint of that country as to offer great promise of economic recovery, there should be rather widespread benefits to agricultural and industrial producers of the United States. The most valuable concession is a great reduction in the Cuban duty on hog lard.



Senator Schall

BELIEVING the emergency phase of agricultural adjustment is about over, the AAA officials are simplifying their program for the future. Tentatively they propose these control plans for 1935:

Wheat—10 per cent reduction in acreage below base, or 75,000,000 bushels. 1934-35 indicated crop, 600,000,000 bushels; desired production, 750,000,000 bushels.

Corn—Possibly a 15 to 20 per cent reduction in acreage, instead of the 30 per cent as specified by the 1934 program.

Hogs and other livestock—No direct control, supply being regulated by adjustment of corn.

Cotton—10 to 15 per cent acreage reduction under base period, 1928-32, with allotment of about 40 per cent; desired acreage, 32,000,000 to 37,000,000; desired production, 11,500,000 to 13,000,000 bales.

Tobacco—Probably a 15 to 20 per cent reduction in acreage, instead of the 30 per cent as specified by the 1934 program.

Plans are under consideration for a national press service to take the place of the Associated Press, the Hearst News service and the United Press. This service, Mr. Schall said, would "have exclusive use of government news and be in a position to give its service only to those newspapers loyal to the Roosevelt dictatorship."

"Once these facts are in my hands," said Mr. Roosevelt, "they will receive the immediate attention in order to make impossible the things you say will be done, because I am just as much opposed to them as you are."

The senator immediately sent to the President and made public a 400 word letter in which he said in part:

"You ask me for 'information' concerning what you have done. Are you attempting to secure the facts so that you may be in a position to refute yourself?

"Your telegram to me bears out the suggestion that a concerted effort to mislead and fool the public. Your desire to make yourself appear before the people of the United States as the champion of a free press may be as insincere as your promises to the people when you made promises for your nomination at Chicago with the statement that you were for their platform 100 per cent.

"To date you have not kept one of the promises made to the American people at that time. Let me recall your memory anger at your disappointment in keeping out of the press code the expression of a free press."

Schall went on to cite what he called "specific evidence" of an intention by the President to force a censorship of the press by the executive and the acts of your Communistic bureaucrats might be hidden from public gaze."

Mr. Roosevelt sent the senator an answer sharply rebuking him for his "vituperative" letter "which gives no facts and does not answer my simple request." In conclusion he said: "The incident is closed."

Schall returned in answer, but milder language that he as a representative of the people could not let the affair rest.

MORE electricity for more people at lower rates is the aim of the federal power commission in a national survey which has just been started. According to Frank Manley, vice chairman of the commission, the survey will enable that body to compile and submit to the next congress the most comprehensive and authentic exhibit of the power resources and possibilities ever made in this or any other country." To obtain the data required the commission has the co-operation of every private and municipally owned power plant in the land.

"Determining the nation's power requirements and how they can be most economically and plentifully supplied is the primary purpose," Mr. Manley explained. "Markets must be considered, as well as power sites that can be developed at reasonable cost, and the governmental enterprises or private capital.

"One purpose is to establish and maintain ideal balance between steam and hydro-electric power which will give industry and the consuming public sources of energy at the lowest possible rates."

DESPITE the Polish denials that a secret pact has been concluded between Germany and Poland, La Liberte, nationalist newspaper of Paris, declares that such a treaty has been signed, and gives the alleged stipulations which provide that Poland will maintain the Polish corridor to the reich in exchange for German support of a Polish attempt to gain control of Lithuania, peaceably or otherwise.

The nationalist organ reports in addition five military and territorial articles and the fact that the treaty contains a series of economic agreements. The effect of the latter calls for furthering raw materials to Germany by Poland, even in time of war, in return for German exports to Poland.

FRANCIS J. GORMAN, head of the strike committee of the United Textile Workers, sent to the sectional leaders the secret instructions for a general walk-out in the cotton textile industry on September 4. The order affects approximately 500,000 cotton mill workers; and about $500,000 more will go on strike Sept. 4 or soon after in the silk, rayon and woolen mills.

"I am fully convinced," Gorman told reporters, "that the strike not only will materialize but will be successful."

The administration, however, still hoped that the strike could be averted through the efforts of the national labor relations board headed by Lloyd Garrison. The union leaders have made it plain that they expect the strike will be indirectly financed by the government through the relief organizations. They admit that their unions have not sufficient funds to carry the workers through the prospective period of idleness.

SENATOR THOMAS D. SCHALL of Minnesota, Republican, engaged in a controversy with President Roosevelt concerning the former's assertion that the administration is seeking to curb the press, and the blind senator used language that was so disrespectful to the Chief Executive that even Mr. Roosevelt's severest critics could not approve of it. The President had asked Mr. Schall for the "facts" on which he based his recent assertion. Schall replied:

"Once these facts are in my hands," said Mr. Roosevelt, "they will receive the immediate attention in order to make impossible the things you say will be done, because I am just as much opposed to them as you are."

I was out on deck awhile ago, and they were cleaning out the life boats. That didn't make me feel any too good. I thought maby they was expecting something. Now here is something I dident know before just how the boodeers ships try to work it in case of accident. Their boats hold 60 apiece. Now there is a big powered launch in fact two of em. When these life boats are filled they are towed along and take on up. Each life boat has ample provisions. Hard tack and concentrated canned foods, and one large container of water, and you are supposed to last quite awhile.

Now this launch gathering these up was all news to me, but thats the way it is supposed to work so that a everything goog off according to the established rules. Of course there is one little hitch in all these plans. Its not a very large hitch, but its of enough importance that it might casually be mentioned, and that is the condition of the sea at the time the enterprises takes place. If the sea is doing enough to wreck a boat, it is liable to be doing enough to keep any immediate assembling from taking place. You can get your life boat over behind a wave from a three story ship, and its like being over another mountain range, you wont see him for weeks. Every once in awhile you might be sighted on the top of one of these Aquatic Mountain tops, but before lifeboat launch, or even Amos and Andy by radio can get to you, you have dropped down into the canyon again. Thats one thing that makes the sea interesting. Nothing ever happens twice the same way on it. I always thought the old captains had the right idea, to sown with the big one instead of sitting on a little one and going down with it, or without it. So its a question whether theirs is heroism, cruelty or just good judgment. There is many a time the big one last longer than the little ones.

But it must be a great life. We need more of our young men to take up the sea. He can get his life started about six or eight years ahead of the rest of his companions. He is a man when they are just a freshman. When they are a senior he is an A. B. (able bodied seaman) that means a diploma, and a fraternity pin. (Able bodied seaman? that means you are a man among men. You havent had 4 years of varsity football, but you can whip the man that has. A swimming pool and a gymnasium dident put those shoulders on you. And when you walk up and ask for a job, you know you know your business, and no man out of a book knows it he knows his or not.

Says WILL ROGERS

HOLLYWOOD, Calif.—Well all I know is just what I read in the papers or what I hears as I talks to sailors. You know there is an old saying that has spent his 75 years on the briny ocean and has always had a ship to the name of "Lucky Strike." They are a old square rigged ship. They call them the old sailors that you see on these passenger boats now, but that got their start on the windjammers. They have been in every port in the world. And everyone of em kinder sings to the tune of old days when they was three months rounding Cape Horn. Course all of us in any line of business are like that. We are always rapping about the "Old Days" and how we was away back and enjoy it, but I tell you there is a lot of truth in it. There is a whole lot of all our past, true that wasent so hot.

American boys never took to the ocean very much. Lots of the New England ones from around Maine did, but the old inland boys, those early pioneers were made to read about, but not to travel around on. Our boys make fine sailors when they will sail, but they want their sailing to be mostly in a roadster. While the hardy youth of the world was going adrift to get stranger, and adjust the jig boom, many I am wrong, chances are I am not, while they was doing that, our lads were working on their carburetors, and everybody going to go to college and come out a bond salesman. An awful lot of the rest of the world went out to get a practical education while we was trying to cram Latin and Greek down youths that would never in all their lives have any use for it.

ROBBERS' ROOST

by

Zane Grey

Copyright.—WNU Service.

SYNOPSIS

Jim Wall, young cowpuncher from Wyoming, in the early days of the cattle industry, seeks a new field in Utah. He meets Hank Hays.

CHAPTER I—Continued

"Wal, friend, the string is thet I want to locate you. Bend over here, so I can get your ear," went on Hays, confidentially, and when Wall had complied he said: "I run true to form today when I had no thet stranger. But it was a blunder, considerin' the fix I have in the fire. Now, listen. Lately I've got in with a rancher over here in the Henry mountains. He's an Englishman with more money than sense. Bought ten thousand head of cattle an' a lot of hosses. There's some tough cowboy outfits over there, an' more'n one real rustler outfit. Wal, this Englishman—his name is Herrick—got the idee of hirin' all the hands available, cowpunchers, rangeriders, gun-toters an' plain out-an'-out bad men. An' to throw this select outfit agin the whole country. What do you think of that idee?"

"Original, to say the least. But not practical, unless he can reform bad men," replied Wall, much interested.

"Wal, exactly. But I'm not concerned with the practicability of it. Herrick took a shine to me, made me what he calls his superintendent, an' sent me all over lookin' for hard-shootin', hard-ridin' men. An' that's how you happened to run into me. I call it good luck for us both."

"You've taken me for one of the hard-shooting, hard-riding kind, eh?"

"Wal, I want you in my outfit," resumed Hays. "Brad didn't cotton to you. I seen first off. But he's a gun-thrower himself. All the same he's in my outfit an' I reckon you might get along. It's Heeseman who sticks in my craw."

"Heeseman. Who is he?"

"Heeseman is the rustler of Dragon Canyon. None of the ranchers even found here know him. They know he's He's got a small outfit, but shore enough bad. An' in some way he got wind of Herrick's scheme. Darned if he didn't pack over to the Henrys an' his outfit an' start ridin' for him."

"Heeseman saw the same opportunity as you?" queried Wall, quietly.

"Wal, yes. I was comin' to thet," resumed Hays, gruffly. "I got the upper hand, though, an' I'll be the boss. Thet'll lead to friction. There'll be two factions sooner or later, an' the sooner thet fight comes off the better."

"I see. Less of a division of spoils."

"Wall, I'm no rustler," snapped Hays.

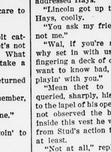
"Excuse me. If I hadn't impertinent, may I ask just what you are?"

"Ever hear of Henry Plummer?"

"Can't remember if I did."

"Wal, Plummer flourished some ten an' more years ago, first in Montana an' later in Idaho. There was a time in the west ruther the West ever developed. Located man of good family, born in the East. But the gold fever called an' he was not the kind of a man to dig. He preferred to be the place ones. Was an officer of the law while he was head of the biggest robber gang the frontier ever had. From Bannock to Lewiston he kept the miners, the stages, the Wells Fargo in terror for years. . . . Wal, I seen Plummer hanged. I was one of his gang, a young man then by years. Now I'm Andy by radio can get to you, you have dropped down into the canyon again. Thats one thing that makes the sea interesting. Nothing ever happens twice the same way on it. I always thought the old captains had the right idea, to sown with the big one instead of sitting on a little one and going down with it, or without it. So its a question whether theirs is heroism, cruelty or just good judgment. There is many a time the big one last longer than the little ones.

But it must be a great life. We need more of our young men to take up the sea. He can get his life started about six or eight years ahead of the rest of his companions. He is a man when they are just a freshman. When they are a senior he is an A. B. (able bodied seaman) that means a diploma, and a fraternity pin. (Able bodied seaman? that means you are a man among men. You havent had 4 years of varsity football, but you can whip the man that has. A swimming pool and a gymnasium dident put those shoulders on you. And when you walk up and ask for a job, you know you know your business, and no man out of a book knows it he knows his or not.



"Sister? It'd be a H—l of a Note If She Did."

It's a long way from one waterin' place to another. But you hit into things, at thet. There's four or five fellers I never seen before."

"Who's the tall one with his hat pulled down, so you can only see his black, pointed beard?"

"Thet's Mose Grimsley. Claims to be a rancher. But if he ain't the boss of the Black Dragon outfit, I'll eat him."

"And the hard feller—the one with the plaid vest?"

"Thet is Stud somethin' or other. Seen him before an' ain't crazy about him."

"Who's the other?"

"Shore, but not just among ourselves."

"Got any money, Hank?" asked Happy Jack.

"Did you ever see me broke? Brad, go dig up some suckers. But not thet hombre they call Stud. He didn't get where he is by bein' a sucker."

There were only two large gaming tables, one of which was in use. Linton went among the men to solicit players, returning with Morley and the russet-bearded giant, Montana. There was no formality or greeting between Hays and these men. It was as if they had already engaged.

"Make it six-handed. Come an' set in, Wall," said Hays. "Friendly little game. Only fifty cents limit."

Wall laughed. "I couldn't play penny ante."

"Wal, I'll stake you."

"No, thanks. I'd rather watch."

"Excuse me, but we don't care for watchers," interposed Morley.

No sooner had they seated themselves than Hays had called and he addressed Hays.

"Ifn'eein got up the game," replied Hays, coolly.

"You ask my friends to set in, an' not me—"

"Wal, if you're so keen about it, why set in with us," went on Hays. "I want to play my cards. "But if you want to know bad, I'm not stuck on playin' with you."

"What depends, Hays," returned Wall.

"Any scruples about it? Remember, I come clean with you."

"No, I broke jail in Cheyenne."

"What was you in for?"

"Shot a man. They were goin' to hang me."

"Ahuh. Was thet square?"

"I didn't think so. . . . Had to kill the jailer to get out."

"Then was all this, Wall?"

"Some years ago."

"An' since then?"

"Been shooting my way out of one jam after another."

"Mus obliged," replied Hays, feelingly. "Wall, you're a hunted man. You're broke. It's about where you cross the divide."

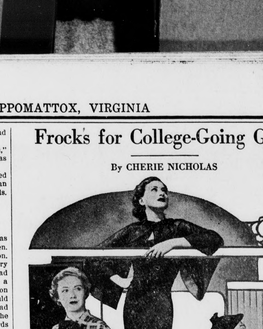
"One more question. What 'bout this Herrick's family?"

"Wal, he ain't got any," rejoined Hays. "We heard somethin' about a sister comin' out, but she never turned up."

"Sister? It'd be a h—l of a note if she did."

Frocks for College-Going Girls

By CHERIE NICHOLAS



WHEN it comes to thrills for the college girl who is selecting her going-away-to-school frocks it is the stunning new and versatile materials which cause hearts to beat faster.

To be sure there is everything imaginable to be had in the way of super-hue buttons, and other clever gadgets together with most beguiling neck wear fantastes to help out when occasion demands, but in the main it's the garment which speaks in terms of handsome material along lines of studied simplicity which wins the highest number of credits.

There is that about the woolens and silks and velvets and synthetic weaves as shown this season which is so intrinsically decorative and satisfying to the eye, little or no frills or furbelows seem to be required to accent the costumes they fashion. Which, no doubt, is the reason why advance fashions indicate that the college girl's wardrobe will, for the most part, be styled on the same smartly simple tailored lines favored by chic business women.

The model to the left in the picture is a dress of this type. The plaid chulla crepe which fashions it is in itself so attractive and self-sufficient, that dressmaker detail would detract from its "classy" simplicity. For service, for looks and for real joy in the wearing a dress of this sort is ideal, and listen to this, ye coeds who needs must watch your budget with an eagle eye, these all-rayon crepe prints are easily washable and iron out smooth and lovely as if by magic—the problem of going back and forth to be dry cleaned is entirely done away with. This plaid (brown, egg-shell and rust is its color scheme) two-piece is cut on the straight-of-the-goods lines with a neat crossgrain bolero, with flat bodice and the double cuffs) best set it off.

Speaking of unusual materials, the dress centered in the group, so sophisticated in its simplicity, is made of, guess what!—sports tulle. This fabric is so perfectly new it's the "last word." The claim to fame of this novel and very good-looking sports-tulle is based on the delightsome sheerness of its weave which together with the fact that it lends itself perfectly to simple lines and classic tailoring assures its prestige as a medium admirably adapted to wear at teas and bridge parties and other smart daytime gatherings. In this model, so simple yet so distinctive in its cut, Alix, who created it of sports-tulle in a black and white mixed effect, has certainly contrived to give the college girl or any young woman of fashion for that matter, the ideal all year-round afternoon dress.

A frock of satin and a frock of velvet should by all means be included in an up-and-going-places college girl's wardrobe. The new daytime satins are so practical as they are stunning in appearance, and so wonderfully slenderizing, fashioned as many of them are with sleek-fitting skirts slit at the hemline in order to give ease of movement. The model pictured to the right in the group is styled along girlish lines and with its jacket becomes a many-purpose costume which can be tuned at will to street or indoor afternoon wear. The treatment of the neckline is interesting, the collar being formed of loops of white velvet ribbon edged with black.

In regard to velvet the big news is smart trimming suits with narrow skirts and neat-fitting jackets, the sort college girls simply adore.

HIGH-STYLE ITEMS

By CHERIE NICHOLAS

Women who delight in veils can wear them to their heart's content, for they are decidedly in the fashion picture. Worn with just the right air, veils can be coquettish and glamorous and the newer veils have that way about them. The pointed contour of the veil pictured is a recent accent which will especially delight the young girl who takes delight in an air of sophistication. Lace slippers for evening match the lace frock. Padova, who created this exquisite type of footwear, has combined black lace and black satin in this model, with white satin under the bow to bring out the delicate patterning. A great vogue is in promise for this type of luxury footwear, this coming fall and winter.

FALL BRIDAL GOWN HAS HEAVY TRAIN

The trains on the new fall wedding gowns mean a heavy day's work for some bridal attendants. Nine or ten feet of shimmering satin will silhouette down the aisle behind the bride.

To dress the bride will be no small task, too, if she has chosen Germaine Monteil's favorite wedding robe.

This designer has a penchant for trains, surpassed only by her love for frills and bows. This fall she gives every large percentage of these people gained lifesaving relief and help by these natural mineral water treatments.

Today, however, you do not have to travel long distances to partake of the healthful qualities of fine natural mineral water. You do not even have to pay the excessive cost of having it shipped to you in quart or gallon containers. For Crazy Water Crystals bring to your own home the precious minerals of one of the world's fine mineral waters in crystal form at a great saving in expense.

A Crazy Water Crystals substitute by nothing is added. All you do is add Crazy Water Crystals to your drinking water and you have a great mineral water which has benefited millions.

If you, or any of your friends, suffer from "rheumatic" aches or pains we suggest you investigate Crazy Water Crystals at once. Just ask any of the millions of people who have given them a full and fair trial and you will realize how beneficial they have been to so many sufferers.

The standard size box costs only $1.50 and makes enough mineral water for several weeks treatment. Crazy Water Co., Mineral Wells, Texas.

Housewife's Idea Box

Selection of Shortening

Some care must be used in selecting the proper shortening for frying purposes. To fry properly, the shortening must be raised to a high temperature. Some fats smoke before they reach this temperature. These fats are not good. As soon as fat smokes it begins to change chemically and quickly becomes rancid.

Girls Unite Enemy Tribes

Through the work of Girl Guides in Africa two native tribes, 180 miles apart, which have been enemies for centuries, have decided to be friends. Each tribe has its Girl Guide company, and they decided this year to have a joint camp. The invitation was sent from tribe number one. The Guides of tribe number two responded and walked the entire 180 miles for a fortnight's fellowship. The shyness of the first few hours was soon broken, as with their leaders they joined in preparing the common meal and helping the old people in the village. In doing their good deeds they soon became friends. Older members of the tribes liked the friendship idea and adopted it.

No More Freckles; Weather-Beaten Skin

It is so easy now to have a lovely skin of satin-like texture; to have smooth, white, flawless new beauty. Just begin tonight by using famous Nadinola Bleaching Cream, tested and trusted for over a generation. The minute you smooth it on, Nadinola begins to lighten, smooth and clear your skin. sults that mean beauty in your complexion. No long waiting; no disappointments. Nadinola is guaranteed. Get a large box of Nadinola Bleaching Cream at any toilet counter, or by mail, postpaid, only 50c. NADINOLA, Box H, Paris, Tenn.

Ambition's Spur

Ambition is a longing that makes some men near great.

DO YOU SUFFER FROM NEURITIS?

American and European Scientists Agree That Mineral Water Is Beneficial

TRY THIS NATURAL WAY

People spend hundreds of millions of dollars every year going to the great mineral water health resorts of Europe and America.

Many of these people have to travel thousands of miles. Many of them have to stay there months and even "rheumatic" aches, from arthritis, from neuritis, from gout. Others suffered from certain stomach ailments or excess acid or sluggishness or a general run-down condition.

The scientific and medical records of Europe and America show that a very large percentage of these people gained lifesaving relief and help by these natural mineral water treatments.

Today, however, you do not have to travel long distances to partake of the healthful qualities of fine natural mineral water. You do not even have to pay the excessive cost of having it shipped to you in quart or gallon containers. For Crazy Water Crystals bring to your own home the precious minerals of one of the world's fine mineral waters in crystal form at a great saving in expense.

Two-Piece Frock Is Due for Popularity This Fall

Many of the daytime frocks beginning to appear just now contain more than a hint of the sartorial picture for the autumn.

Two-piece tunic frocks appear at the smartest places, many of them in silk, making it easy to visualize this fashion in woolens.

A typical advanced style frock is a two-piece tunic town model in beige silk.

The line is fairly severe but is softened by an enormous ruffled jabot cut from the dress fabric and pulled through a ring at the side of the neckline for fastening.

Long Sashes, Wide Belts

Wide belts are used on the new fall sports clothes. And long, flowing sashes, tied in front, are shown on street and afternoon dresses.

Tortoise Shell Clips

Tortoise shell or crystal hemispheres rimmed and centered with gold make smart clips designed for winter frocks.
